CEDIA

"You can't connect the dots looking forward.
You can only connect them looking backward."
Steve Jobs

Rich's Thesis: "Social Presence"

Market Opportunity and Profit

"In the 2030s we are going to send nano-robots into the brain (via capillaries) that will provide full immersion virtual reality from within the nervous system and will connect our neocortex to the cloud. Just like how we can wirelessly expand the power of our smartphones 10,000-fold in the cloud today, we'll be able to expand our neocortex in the cloud."

Ray Kurzweil

Reality Check

- **Macromyopia:** We tend to over-estimate short term change and under-estimate long term change

"The history of every dead and dying 'growth' industry shows a self-deceiving cycle of bountiful expansion and undetected decay."

Theodore Levitt, Marketing Myopia, 1960

Defining The Internet of Things

1. Things
2. Connected to
3. The Internet

Ease of Use, Interoperability, and Mass Market Adoption

Wireless Network "Generations"

Generation	Technology Standard	Capabilities	Maximum Data rate	Latency	Year Introduced
1G	AMPS	Analog voice	<10 Kbps		1979 (Japan) 1983 (US)
2G	GSM, CDMA	Digital voice	64 Kbps		1991 (Finland)
2.5G	GPRS, EDGE	Digital voice + data	144 Kbps	600 ms	2001
3G	WCDMA, HSPA	Circuit switched data	3.1 Mbps	200 ms	2002 (S. Korea, US)
3.5G	HSPA+	Packet switched data	28 Mbps	170 ms	2008
4G	LTE	Wireless broadband	400 Mbps	<100 ms	2009 (Sweden)
5G	5G-IMT-2020	Flexibility to address multiple use cases	> 1 Gbps	< 1 ms*	2020

* This is estimated 5G latency, not 5G

The Next Generation Mobile Networks Alliance defines the following requirements for 5G networks:

- Data rates of tens of megabits per second should be supported for tens of thousands of users
- 1 gigabit per second to be offered simultaneously to many workers on the same office floor
- Several hundreds of thousands of simultaneous connections to be supported for massive sensor deployments
- Spectral efficiency should be significantly enhanced compared to 4G
- Coverage should be improved
- Signalling efficiency should be enhanced
- Latency should be reduced significantly compared to LTE.^[1]

The Next Generation Mobile Networks Alliance feels that 5G should be rolled out by 2020

DIY

KICKSTARTER

"The future belongs to new entrants.
They change the rules." Steve Jurvetson

Try to guess the dominant technologies and companies of the year 2020 and you may quickly fall into the traps of entrenchment and tradition. There are plenty of reasons to be conservative and continue with the tried-and-true. However, in today's technology landscape the "new entrants" who disrupt traditional business models with grass-roots innovation may leave you behind.

THE GLOBAL BRAIN
 We radically simplify the world by providing an intelligent interface to everything.
 Adam Cheyer

Their goal is to build a new generation of AI that can process massive troves of data to predict and fulfill our desires. Viv strives to be the first consumer-friendly assistant that truly achieves that promise.

It wants to be not only blindingly smart and infinitely flexible but omnipresent."

VR

"I believe we're in the virtual world now more than the real world already, it's just that our interface sucks. We're in that barbaric place where the interfaces to the machines don't consider the human side."

Mark Bolas
USC Institute of Creative Technologies

"...virtual reality is the natural extension of every major technology we use today.

The technology is powerful. It's like uranium. It can heat homes and destroy nations.

Jeremy Bailenson
Stanford University Virtual Human Interaction Lab

Not immediately, but within 15 years, the bulk of our work and play time will touch the virtual to some degree. Systems for delivering these shared virtual experiences will become the largest enterprises we have ever made.

Yet something certainly has just happened. A threshold has been crossed. After a long gestation, VR is good enough to improve quickly. It's real.

<http://www.wired.com/2016/04/magic-leap-vr/>

Kevin Kelley

"We're going to get to the point where virtual reality is indistinguishable from reality itself...it's the final platform." Palmer Luckey

\$2,001,985,000

Palmer Luckey refers to things outside of Virtual Reality as Real Reality, what the rest of us call Life.

"When we get to this world, a lot of things we think about as physical objects will just be \$1 apps in an AR app store."

SIMPLE

Out of clutter, find simplicity.
Albert Einstein

"...any third-rate engineer or researcher can increase complexity;
but it takes a certain flair of real insight to make things simple again."

E.F. Schumacher, *Small is Beautiful*

To attain knowledge, add things every day.
To attain wisdom, subtract things every day.

Lao Tzu

August
Door Lock

"The most profound technologies are those that disappear. They weave themselves into the fabric of everyday life until they are indistinguishable from it".

Mark Wisner, Xerox PARC
1991 Scientific American

The Age of

invisible design

Wired Magazine, Scott Dadich, 8.13.13

"Design doesn't just make things beautiful, it makes them work...at best, it is invisible."

Wired Magazine, Scott Dadich, 8.13.13

1. Good design is innovative.
2. Good design makes a product useful.
3. Good design is aesthetic.
4. Good design makes a product understandable.
5. Good design is unobtrusive.
6. Good design is honest.
7. Good design is thorough down to the last detail.
8. Good design is environmentally friendly.
9. Good design is long-lasting.
10. Good design is as little design as possible.

How to prepare your business for 2020:

- Brand yourself-earn loyalty
- Build a Design Center-test and use new technologies
- Sell great ideas-charge by the minute - "Lifestyle Engineering"
- Focus on people-hire and keep talent
- Women
- Software Engineers and Network Specialists
- User Interface Designers
- Smart Kids (they know what's going on)
- Practice respectful design for human beings
- Enhance your truck roll capability (Digital Truck Roll!)
- Never compromise on customer service
- Never, ever lose a customer to new technology
